

Master of Science in Information Technology Management Degree Program

Master of Science in Information Technology Management serves the needs of programmers, developers, engineers, and other knowledge workers who aspire to move into technical leadership positions. The emphasis is on moving technology out of the laboratory and into business development, defining the role of information literacy in decision-making and exploiting information technologies for productivity and competitiveness. The program is rich in real-life assignments and case studies. A total of 36 credit hours are required to earn a Master of Science in Information Technology Management Degree.
